

MOHAMMED ALQAHTANI

PROCUREMENT DIRECTOR

Riyadh, Saudi Arabia (open to GCC) | m@maqg.me | +966 55 075 1857 | linkedin.com/in/mohammedalqahtani123

CORE COMPETENCIES

Procurement Center of Excellence · Procurement Transformation · Procurement Governance · Strategic Sourcing · Government Procurement · Saudi GTPL & Etimad · Category Management · Local Content & IKTVa · Contract Lifecycle Management · Supplier Qualification & SRM · Cross-Border Procurement · Multi-Entity Team Leadership

PROFESSIONAL EXPERIENCE

HWADI Group — Riyadh, Saudi Arabia Jan 2025 – Present
Procurement Director

- Lead group-wide procurement across HWADI's 16 subsidiaries in a multi-entity environment — an enterprise-scale spend portfolio spanning 100+ concurrent projects, with ~75% of delivered spend tied to government and government-linked programs (Ministry of Culture, Ministry of Media, Aramco, UNESCO).
- Inherited a fragmented category landscape with weak governance and no executive spend visibility; centralized category management and sourcing strategy across construction, cultural infrastructure, national events, hospitality, and indirect spend.
- Cut purchase-order cycle time 71% (from 7 days to 2) and reduced petty-cash dependency ~90% by replacing manual purchasing with a governed, digitized procure-to-pay flow on Microsoft Dynamics 365.
- Delivered 12–18% cost savings and 8–12% cost avoidance through strategic sourcing, framework agreements, structured negotiation, and commercial controls across construction, cultural infrastructure, events, and hospitality.
- Stood up a governed digital operating model — three-tier approval matrix, delegation of authority, and pricing-intelligence dashboards — enforcing audit readiness and segregation of duties across the full procure-to-pay cycle.
- Built the proprietary HWADI/EGZ Portal on Dynamics 365 — extending spend visibility, AI-assisted intake, barcode supplier check-in, and AI close-out reports to field teams with limited ERP access.
- Embedded Saudi GTPL, Etimad, and Local Content/IKTVa criteria into sourcing strategy, supplier qualification, and category management — expanding qualified Saudi suppliers and reducing single-source exposure on critical categories.
- Lead a 26-person function across procurement, logistics, and warehousing, partnering with Finance, Legal, Projects, and the Executive Office. Promoted from Manager to Director within 3 years on measurable transformation outcomes.

HWADI Ltd. — Riyadh, Saudi Arabia Jan 2022 – Jan 2025
Procurement Manager

- Built the procurement function from zero — department structure, operating model, policies, SOPs, governance frameworks, delegation of authority, and approval matrix — recruiting and training a 26-person team.
- Established a centralized supplier qualification and governance model (onboarding, evaluation, performance management, periodic review), building a qualified vendor master of 370+ suppliers.
- Led enterprise ERP transformation on Microsoft Dynamics 365 across all subsidiaries — procure-to-pay, budgeting, and AP with Etimad and GTPL integration — cutting procurement cycle time ~35%.
- Reduced petty-cash dependency ~90% and stock variance ~30% through PO enforcement, internal controls, digital inventory, and warehouse discipline.
- Launched procurement KPI dashboards delivering first-time executive spend visibility and strengthening supplier performance management and contract governance.
- Owned the full Etimad government-tender lifecycle (RFP/RFQ, bid evaluation, pricing governance), enabling delivery across 100+ concurrent projects.

BAE Systems Inc. — Al Khobar, Saudi Arabia Feb 2019 – Jan 2022
Supply Chain Specialist

- Managed sourcing inside an ITAR-regulated defense supply chain supporting RSAF Typhoon (Salam), Tornado, and Hawk sustainment programs under strict export controls and 26–52 week OEM lead times.
- Renegotiated long-term OEM supply and repair agreements with Tier-1 UK, US, and European aerospace OEMs; deployed supplier scorecards, risk assessments, and corrective-action plans.
- Introduced consignment stock and approved alternate sources — delivering 10–15% cost reduction and ~20% lead-time improvement while reducing single-source risk.
- Maintained a clean, audit-ready ITAR and export-compliance record across internal and external audits; supported Local Content/IKTVa value creation under the Saudi offset program.

Massarah Guest Management — Al Khobar, Saudi Arabia Jun 2017 – Feb 2019
Procurement Officer

- Established framework agreements across civil, architectural, and MEP categories and migrated purchasing onto ERP-enabled procure-to-pay workflows with reorder triggers.
- Consolidated a fragmented supplier base and introduced category management, standardized pricing references, and structured negotiation baselines.
- Delivered 15–20% cost savings, lifted PO accuracy to 99%, and cut stock-outs ~30%.

KEY PROGRAMS

- **UNESCO 45th World Heritage Session (Riyadh 2023)** — first session in the Arab world; diplomatic-grade procurement for 2,000+ delegates and 195 state parties over 18 days; 100% on-time vendor payment, zero disruption.
- **IKTVa Forum (Saudi Aramco)** — end-to-end event procurement for 500+ exhibitors from 50+ countries under Aramco local-content standards.
- **Impaq 2024 (Ministry of Media)** — full supply chain across venue build-out, broadcast technology, and hospitality for 30K+ attendees, 100+ speakers, 370+ suppliers.
- **Zarqa Al-Yamama (2024)** — first Saudi grand opera; cross-border procurement of international talent (80-member orchestra), instruments, and costumes across multiple jurisdictions.
- **Terhal 2025 (Ministry of Culture, with Dragone)** — large-scale production; 46,000 attendance, 30+ live shows, teams from 6+ countries; pyrotechnics, special effects, and rigging under one governance framework.

LICENSES & CERTIFICATIONS

- **CIPS Level 3 Advanced Certificate in Procurement & Supply Operations** — Chartered Institute of Procurement & Supply (CIPS), UK
- **Certified Professional in Supply Management (CPSM)** — Institute for Supply Management (ISM), USA

EDUCATION

B.S. in Supply Chain Management & Information Systems — The Pennsylvania State University, Smeal College of Business · 2017

PERSONAL PROJECTS

- **3D Printing — End-to-End AI-Automated Workflow:** fully automated 3D-printing operation across the value chain (demand capture, AI-assisted design, slicer optimization, queue management, vision-based QC, packaging, last-mile delivery); AI agents at every stage cut manual touch-points ~80%.
- **Personal AI Operations Dashboard:** multi-LLM command center integrating Claude, GPT/Codex, Gemini, and local models — multi-agent review loop, mention-based routing, service orchestration, and persistent memory; completed a security-hardening phase (48 findings remediated across 3 phases).
- **Luxury Watches Brand — 10-Agent WhatsApp AI Sales Platform:** WhatsApp-only sales platform with a regional sales persona (voice notes, photo captioning, multi-day memory); runtime optimization cut cost 50% and cold-start 10x.
- **Receivables / Collections Operations Dashboard:** workflow dashboard for an internal collections team across a 5-stage SOP — role-based access and full audit trail.
- **Restaurant Operations Dashboard:** daily-operations prototype — order intake, inventory tracking, supplier-ordering automation, daily P&L snapshot, and customer-feedback aggregation.
- **Internal Operations Portal Concept:** governance and project-control platform on Dynamics 365 unifying HR, projects, procurement, and finance with AI-assisted intake and barcode supplier check-in.
